

IMAGINE YOURSELF IN FUTURE

LESSON PLAN- Physic

TOPIC: Simple electrical circuits

AIMS:

- a student knows the circuits elements and setting up of the simple electrical circuit
- a student recognizes the function of the circuit elements that make up the simple electric circuit and establishes a working circuit.

AFTER THIS LESSON:

- a student will know function of the circuit elements.
- he /she will be able to set up a simple electrical circuit.

COURSE OF LESSON:

- 1.Introducing the topic and the aims of the lesson.(short discussion)
- 2.The tasks of the circuit elements are explained and an electric circuit is formed.
- 3.Battery,socket,bulb,switch,cable visuals are examined.The light bulb is provided.

Quiz:

- *What are the circuit elements in a simple electrical circuit?
- *Introduce the function of circuit elements,please?

Activity:

- a simple electrical circuit is set up by students.

Prepared by Turkish school.
